

Location

Monday and Tuesday:

Salle du Conseil de
l'observatoire

Wednesday and Thursday:

Salle des séminaires de
l'IAP (level -1)

Program

Location: salle du Conseil de l'observatoire

Monday 11

9h-9h30	welcome, coffee, croissants...
9h30-9h50	J. Devriendt – S. Peirani « General presentation of the workshop »
9h50-10h25	Adrianne Slyz (Oxford) « <i>Gas Accretion, shocks and other issues in the NUT simulation</i> »
10h25-11h	Julien Devriendt (Oxford) « <i>On the angular momentum of disks and the Tully-Fisher relation</i> »
11h00-11h20	BREAK
11h20-11h55	Christophe Pichon (IAP) « <i>The rig of dark halos: why are cold flows consistent with the inside-out build-up of thin disks?</i> »
11h50-12h30	Taysun Kimm (Oxford) « <i>The cosmic angular momentum of baryons and dark matter</i> »

Tuesday 12

9h-9h15	coffee, croissants...
9h15-9h50	Kyuseok Oh (Yonsei) « <i>Broad-line region galaxies</i> »
9h50-10h25	Damien Le Borgne (IAP) « <i>Understanding the cosmic star formation history with observations and models</i> »
10h25-10h45	BREAK
10h45-11h20	Hyunjin Jeong (Yonsei) « <i>Spatially-resolved stellar population properties of ETGs</i> »
11h20-11h55	Hyewon Suh (Yonsei) « <i>Stellar properties of galaxies</i> »
11h50-12h30	Marc Sarzi (Hertfordshire) « <i>On the role of flattening in shaping the hot gaseous haloes of ETGs: an ATLAS^{3D} study</i> »

Program

Location: salle des séminaires de l'IAP

Wednesday 13

9h-9h15	coffee, croissants...
9h15-9h50	Benoît Semelin (Obs. Paris) « <i>Epoch of reionization: on the nature of the first sources of light</i> »
9h50-10h25	Stree Oh (Yonsei) « <i>Effects of bars</i> »
10h25-10h45	BREAK
10h45-11h20	Intae Jung (Yonsei-IAP) « <i>Halo merger trees</i> »
11h20-11h55	In-Chan Ji (Yonsei) « <i>Galaxy merger simulations</i> »
11h50-12h30	Ho-Seung Choi (Yonsei) « <i>Effects of cosmological parameters to halo merger trees</i> »

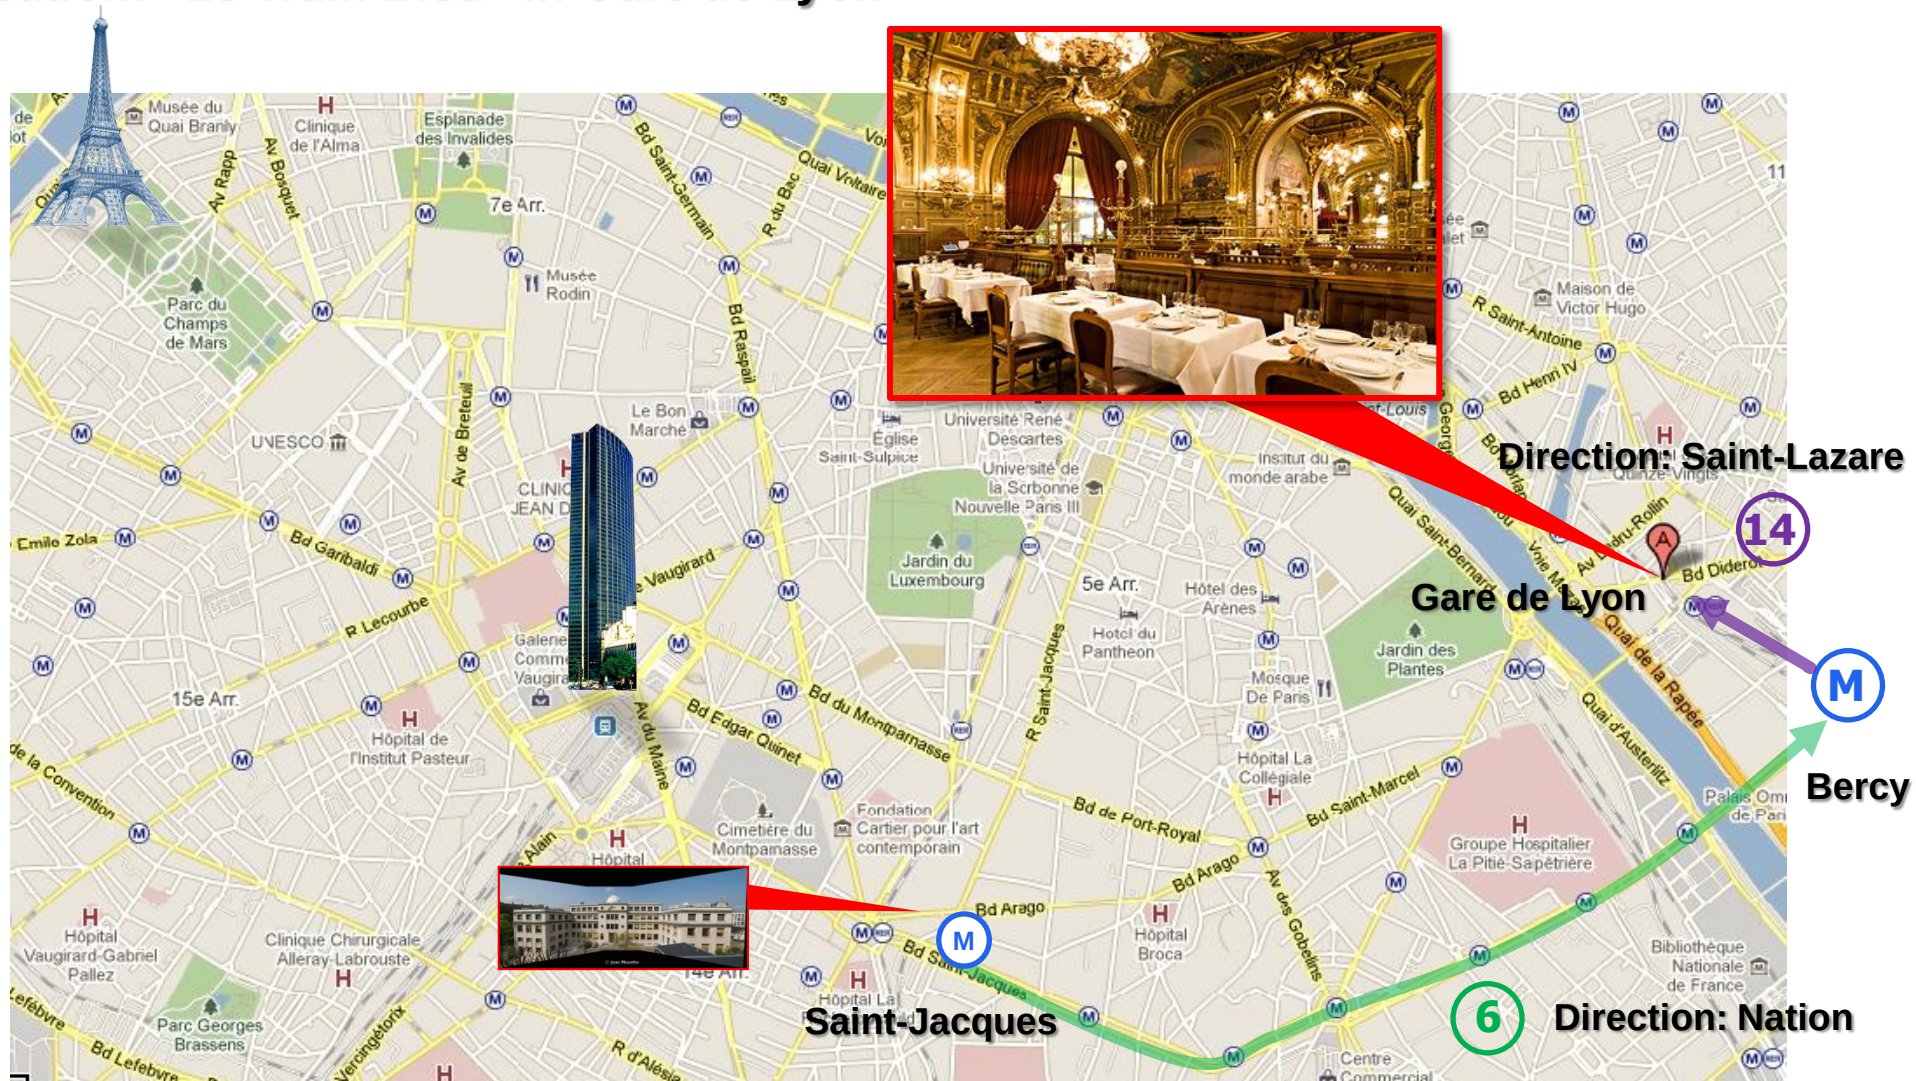

Thursday 14

9h-9h15	coffee, croissants...
9h15-9h50	Sukyoung Yi (Yonsei) « <i>Cluster galaxy evolution</i> »
9h50-10h25	Jay Lee (Yonsei) « <i>BCGs in semi-analytic models</i> »
10h25-10h45	BREAK
10h45-11h20	Yohan Dubois (Oxford) « <i>How AGN feedback and metal cooling shape cluster entropy profiles</i> »
11h20-11h55	Song-Youn Park (Yonsei) « <i>Radio observations on liner candidates</i> »
11h50-12h30	Marc Sarzi (Hertfordshire) « <i>The Planetary Nebulae in the central population of M32: the Sauron view</i> »

Conference dinner

Wednesday evening from 7.30

Location: “Le Train Bleu” in Gare de Lyon

Less than 30 minutes from IAP

Restaurants nearby IAP

● 10-15 €

● 20 €
